

# Xtreme Token

Next Generation Finance & Payment  
Solutions

# Background

The advent of the blockchain technology has introduced the world of decentralization and is challenging our preconceived perspectives of the current social, political, and economic systems, most notably, the central banking system. The rapid advancement of this technology has begun to blend world borders and statute, providing glimpses of an improved, alternative future. Yet, the technology is still at its infancy and is confronted with limitations in terms of performance, ease of use, and service quality.

The digital assets market has been gaining momentum in recent years as digital transformation brings people together from all over the world through frictionless money transfers, seamless electronic payments, and disruptive digital assets savings and lending programs.

The cryptocurrency market has shown explosive growth as it recently reached a new all-time high market capitalization of around \$2.7 trillion USD in 2021\*, and is expected to continue growing at an exponential rate.

Furthermore, the digital assets market has gradually received mainstream acceptance with the increasing clarity of regulations regarding digital assets products and services.

In addition to cryptocurrency, we also see more use cases and opportunities surrounding NFTs or Non-Fungible Tokens. NFTs are a relatively new product as more than \$2 billion USD was spent on NFT (Non-fungible tokens) in Q1 2021.

**For the first time we can send 'value' in the same way we send an email. Online - globally, cheaply, immediately.**

Blockchain, cryptocurrencies, and tokenization are the catchwords of a crypto revolution that promises to solve global problems and create virtually unlimited opportunities. Specifically, it can unleash the power of innovation driven by properly financed and resourced entrepreneurs.

Satoshi's Bitcoin whitepaper in 2009 described a new peer-peer electronic cash payment system that would eliminate 'the middlemen' in the global monetary system.

Then in 2013, heralding the next generation of the internet, Vitalik's whitepaper on Ethereum proposed smart contracts on a universal blockchain. However, the problem with that was the internet had become centralized, controlled, and manipulated.

# Challenges and Market Opportunity

Generally, the majority of blockchain projects place emphasis on their decentralization methodology and lack evidence of adoption in the real world due to their technological and business limitations. Xtreme token aims to overcome such challenges and help advance our society towards true hyperconnectivity.

The future is cryptocurrency. The birth of Bitcoin over a decade ago has proven that blockchain technology is revolutionary and that its impact will be felt for decades to come. This is the new internet and we are all into it.

This explosive growth in the cryptocurrency market represents a significant opportunity for Xtreme Token to deep dive into and work with various business partners to offer exclusive items to benefit our users. But there are some challenges in cryptocurrency market as we see :

## **Cryptocurrency Fluctuation & Mass Adoption**

The biggest challenges facing the blockchain and digital asset industry include the fluctuation in trading volume and the mass adoption of blockchain technology. The market capitalization of the cryptocurrency market surged in 2021 reaching an all-time high of USD \$2.7 trillion, with Bitcoin price hitting USD\$69,000.

While the value of the cryptocurrency market reached new heights, we still see that traditional financial investors are struggling to seamlessly diversify their portfolio into cryptocurrency and place their trust in cryptocurrency investments. Therefore, Xtreme token aims to educate and support traditional investors by providing an easy and seamless experience to gain exposure in cryptocurrency and other digital assets.

## **Limited Use Cases.**

The market for cryptocurrency is still concentrated on trading and investment use cases. Xtreme token aims to expand the use cases for cryptocurrency beyond these, and connect cryptocurrency users with real-world use cases and experiences.

## **Cyber Security**

Other challenges that most blockchain and digital asset companies face include fraud and cybersecurity. At Xtreme token, we aim to overcome this by investing in best-in-class security solutions.

## **Legal Issue**

The lack of clarity in legal and regulatory frameworks is one of the most significant challenges to the mainstream adoption of cryptocurrencies and the operations of digital asset exchanges in the industry. Nonetheless, we believe the development of global rules and regulations will allow for increased certainty and the legitimization of digital assets, which will in turn help bring the digital assets industry to global acceptance and mass adoption. Our company is legally registered in Dubai.

# Vision of Xtreme Token

The vision of the xtreme Project is to introduce the new era of decentralization by redefining the meaning of communities and creating a new world by connecting such communities. Communities today are commonly defined by its social and political functions and limited to the economic boundaries set forth by world nations. Through Xtreme token, communities can go beyond and be free from traditional economic system and promote frictionless value exchanges with other communities, eventually resulting in maximum total utility of society. Xtreme token is not limited to the real world, but it directly connects and communicates with the crypto world creating the most robust network that can scale without limits.

Xtreme token is a vision with a proven track record and has progressed beyond the initial concept stage. Xtreme token already boasts communities comprised of reputable institutions – government, banks, securities, insurance, hospitals, universities, and more. A future with faster money remittance and frictionless value exchange of securities, medical records, academic data, insurance fees is within our reach.

# Introduction

*“Tokenization is the key to solving both problems. ”*

The Xtreme Token (XTR) is a BEP-20 traded digital asset native to the **Xtreme ecosystem**. It is a utility token designed to provide Xtreme ecosystem benefits and to enable access to attractive opportunities, as well as innovative products and services in the digital asset space.

**XTR holders** have access to various ecosystem benefits on **Xtreme Exchange**, such as a boost on the bonus earned on digital assets they deposit in their **Xtreme wallet** and lower fees on the Xtreme Exchange. Apart from earning additional bonuses on digital assets locked in our program, XTR holders will soon be able to participate in reward programs where they can earn new tokens as a reward.

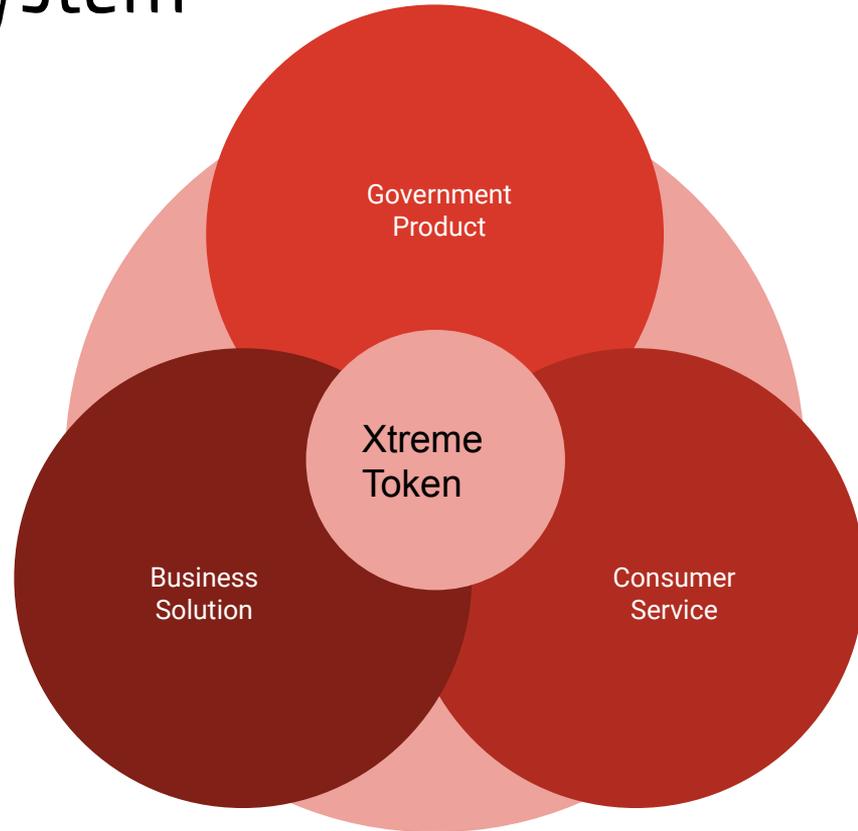

In addition to Xtreme ecosystem benefits and opportunities, under Xtreme's payment program, **Xtreme Pay**, users are not only able to make electronic payments with XTR using QR codes with merchant partners but can also use the Xtreme Card issued under Xtreme pay to receive attractive rewards when making payment in XTR.

XTR token has special benefits on the **Xtreme Travel platform** for various flights, hotels, and travel booking rewards provided. Furthermore, users can use XTR to redeem limited edition products and gain access to exclusive experiences on **Xtreme Marketplace**. In the future, users will also be able to purchase and trade NFT collectibles curated with our partners on the Xtreme Marketplace platform.

There are 1000s of tokens in market, But you need to understand just having a token isn't enough. The token needs to unlock new opportunities, provide tangible benefits, and provide long-term stability and growth. This will possible from Xtreme Token Ecosystem. We believe Xtreme Token Ecosystem will provide long term use case and utility in the cryptocurrency space.

Government	Business	Individuals
Simplify government process	Access to new market	Unlimited access
Increase Revenue	Increase Efficiency	Reducing middle layer
Control Crime	Saving cost	

# Xtreme Token Ecosystem

# Government Product

- 1 Digital Currency
- 2 Whitelevel Payment Solution
- 3 Voting System

For each of these products, Xtreme offers turnkey products for solving a wide variety of tasks in government. These solutions will drastically :

- Simplify government processes
- Increase government revenue
- Reduce crime
- Eliminate tax evasion & identity theft
- Bring complete control back to government executives

The core of Xtreme ecosystem for government is the Digital Currency Platform. The Digital currency system hosts a nation's currency and allows absolute control and oversight by executives in government.. This platform gives every citizen of a nation the ability to access to all major government services in one place. This platform is accessible on nearly every electronic device and operating system.

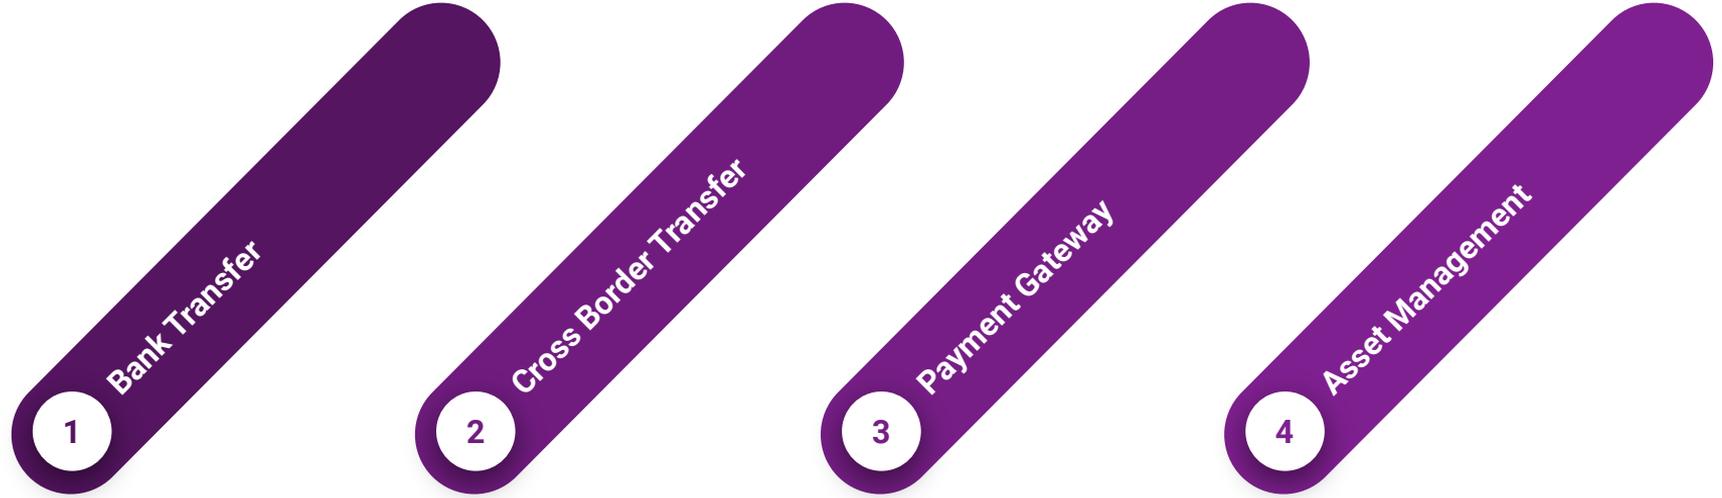

The powerful aspect of the Digital Currency Platform is the notification system. Every citizen will have access to the Digital Currency Platform from their phone, computer, tablet, smartwatch, or via SMS messages.

This notification system will allow authorized government personnel to publish nationwide notifications which will be sent to every citizen on all of their devices as well as an SMS text message.

The government using the Digital Currency Platform will also have the ability to create public polls to request input and gauge public options. Executives in Government will also have the ability to create public polls to request input and gauge public options. The proposed government polling system allows a nation to conduct nationwide polls, instantly with the push of a button. Where a traditional poll/vote would require thousands of employees and millions of dollars in infrastructure.

The Tax System as a part of the Digital Currency gives the government the ability to seamlessly apply automatic tax payments to any transaction, account balance or specific action performed from any type of account. It should be noted that described xtreme ecosystem has a modular architecture. That means that the Digital Currency Platform may be fully implemented to the governmental system or partially. The level of implementation and integration will depend on the presented tasks.

# Business Solution

Blockchain is the safest way to run any financial platform because it ensures absolute security and immutability. It's revolutionary technologies, such as sharding and adaptive forging, have made it not only the fastest but the safest financial platform on Earth.

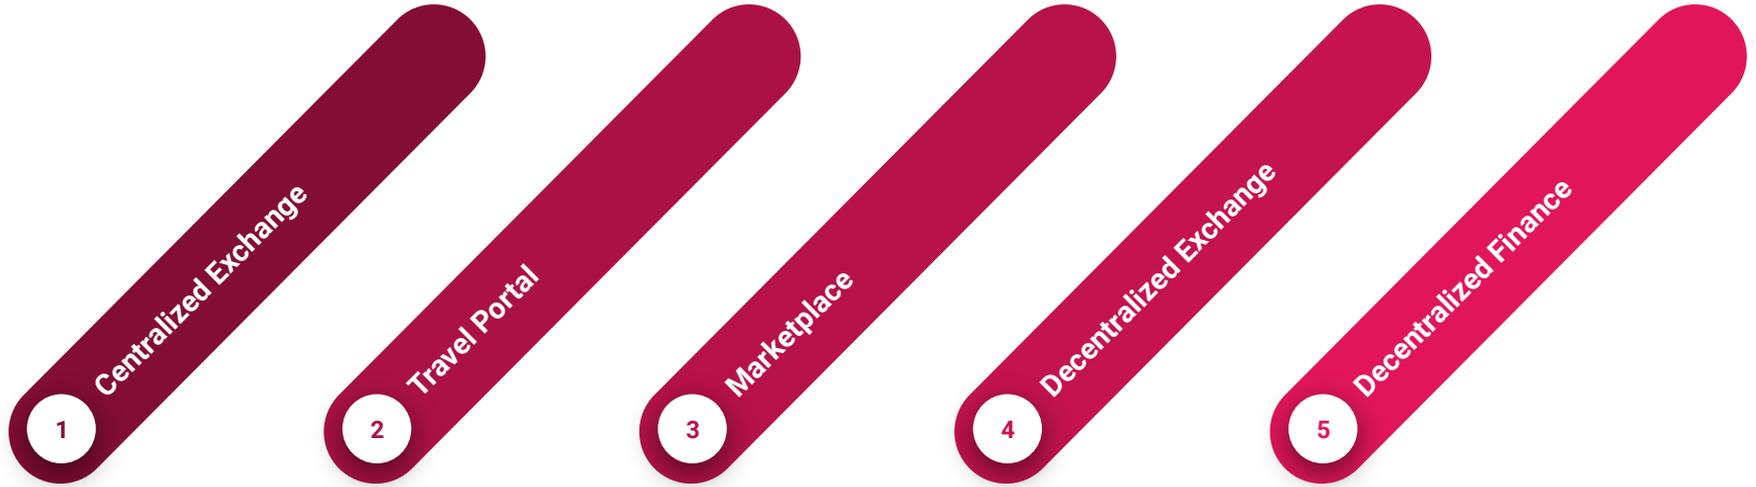

Comparing with Visa, the World's largest and most trusted payment processor, the advantages are clearly seen. Visa can take 15 to 30 seconds to process a transaction and is capable of processing 1,700 transactions per second. Xtreme Ecosystem, by comparison, is up to 30x faster with a transaction speed of subsecond to two Seconds. Its blockchain will soon be capable of more than 1,000,000 transactions per second, this is nearly 588 times the processing power.

The Xtreme bank transfer platform gives a central bank the ability to conduct instant payments to and from any bank in the network using local currency as well as foreign currency if needed. The platform can be used after a simple integration using the Xtreme Bank Transfer API or instantly by using the stand alone platform. Payments can be sent, received and tracked nearly immediately

- Payments can be sent to any international banks integrated in the platform. Funds can be sent in local currency only or exchanged instantly during transfer and received in a number of currencies
- Payments are made on a distributed database that is incorruptible, unhackable and cannot be manipulated

A payment gateway is a payment method that allows any bank or commercial entity to provide payment processing services for third party companies.. That means that in a payment solution, the company uses its to accept payment for their business. By utilizing this payment system, a business can save a substantial amount of time and resources and gain access to technology that not only proven but far superior to traditional platforms.

# Consumer Service

Xtreme ecosystem has own developed marketplace for trade anything on platform where xtreme token will use as payment. This will give the great benefits to the token holders to utilized token in day to day life. The business can promote their business to get new customers and earn more benefits without any restrictions.

Xtreme Travel is the online travel platform for users to get flight, hotels and holiday packages, the major benefits of this platform is to connect users with direct service providing by eliminating the middleman, so it saves money and time for both service providers and users. Xtreme token proposes the centralized Exchange service to exchange the native tokens and other.

Xtreme DEX is a software package for the exchange of digital assets at peer-to-peer networks. Unlike traditional (centralized) exchanges, DEX does not have a single center acting as a guarantor of the transaction. In fact, assets are transferred directly from the sender to the recipient within DEX excluding third parties.

# Technology Behind Xtreme Token

## **Smart Contract**

Smart contracts are account holding objects on the Binance Smartchain .Smart contracts contain code functions and can interact with other contracts, make decisions, store data, and send BEP 20 tokens. Smart contracts are autonomous because each one can operate under different rules and, as such, eliminate any intermediaries. This is how the full decentralization is achieved.

Xtreme Token uses binance smart contract to create and execute orders with some additional conditions and rules. In particular, Binance smart contract allows to transfer of funds with confirmation from the recipient and to set a time limit for the entire procedure. A number of the most significant technical and ideological solutions that give Xtreme token a number of advantages have been considered above.

## **Crypto wallets**

With the basic functions such as storage, withdrawal, deposit, and swapping between crypto to crypto and crypto to fiat to crypto. Our team aims to create safe wallet for communities in which they can purchase physical products in real life by crypto.

Usually, a cryptocurrency is inaccessible to the majority of the world as it requires a bank account, computer, knowledge, and patience. At the same time, our crypto wallet promote unparalleled mass adoption and crypto access. Our solution to this barrier is to initiate a decentralized network of individuals allowing anyone to download and purchase XTR, simply with cash/card/crypto. This will open up cryptocurrency to the vast majority of people without a bank account.

## **Mobile app for QR Payment**

The app lets users scan a QR code with their smartphone, which initiates a payment. For example, people can scan a QR code at a shopping mall using their smartphone camera and make payment.

Xtreme token brings online and offline business on network for payment acceptance and settlement. For the easy usage, Xtreme Pay has the feature of QR payment where xtreme token holders/users can make direct payment to merchants accepting XTR tokens.

This will give the great advantages to the business to store the crypto, and help saving cost/fee on transactions.

# Xtreme Token Platform

## Staking

The users can get the passive earning regularly for just owning the token

- Fixed term staking gives users attractive rewards
- Platform also promote the flexible staking.

## P2P

The platform enable the feature where you can directly buy sale tokens with others.

- The users can buy/sale Xtreme Tokens using peer to peer network.
- You can decide the price for your tokens.

## Payment

The platform support business to accept the crypto as payment service.

- Business can use this platform to accept the payment for their business
- Users can use the platform to make payment for merchant.

# Staking

The users can get the passive earning regularly for just owning the token.

Staking is the reward based approach Xtreme token provide to users encouraging for long term holding of token. There are two type of staking program

## **Fixed term staking program:**

This is for the users who are looking for fixed terms of saving crypto and earn high yield. The users have to wait till the end of locking period for withdraw.

## **Flexible term staking program:**

The Flexible term of staking program will promote for flexible time frame of withdraw the token. Users can cancel the staking tokens when they need.

In general, The fixed term staking has higher return of investment as compare to flexible term staking.

# P2P

The platform enable the feature where you can directly buy sale tokens with others.

The users can directly buy/sales \$XTR tokens to each other from platform itself. It means user don't need to go to third party or any exchange for it. Which will be the great benefits for :

- User can set the price for their token.
- Peer to peer network in foundation for decentralization of our own blockchain for future.

# Payment

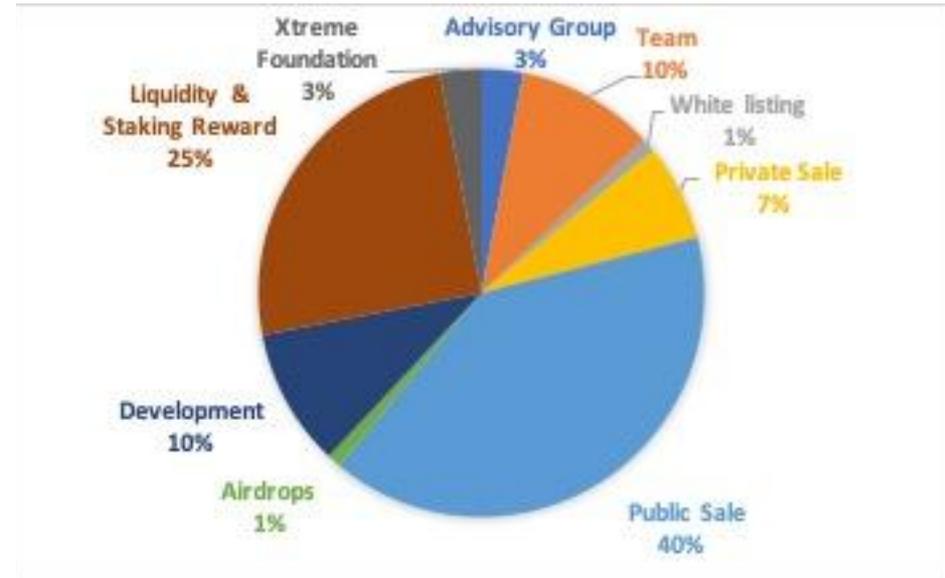

**The platform support business to accept the crypto as payment service.**

Business can use the xtreme pay product to accept the crypto as payment service to accept payment from clients. It support both online and offline/physical business. The online platform can use the payment api on their website/mobile application for automation of payment service. The physical business can issue their unique QR payment card to show it with customer who want to make crypto payment.

User can use the app to make payment to merchant using QR scanner which settle on the realtime.

# Xtreme Tokenomics

- **Token Name** : Xtreme Token
- **Token Symbol** : XTR
- **Total Supply**: 2B
- **Contract Address**: 0xdc401adadb27e5  
b72909ca77f36a052830282224

Advisory	3%	1 year lockup
Team	10%	1 year lockup
Airdrop	1%	No lockup
Private Sales	7%	10% unlock at listing on exchange. Linear vesting over 1 year
Public Sales	40%	No lockup
Liquidity and staking	25%	No lockup
Whitelisting	1%	No lockup
Xtreme Foundation	3%	1 year lockup
Research and Development	10%	1 year lockup

# Utility of XTR token

**Exchange of Assets** : \$XTR can be used as medium of exchange of various digital assets traded within the fanverse platform.

**Governance Voting** : \$XTR holders can raise the critical opinion on the platform for new features, reward program, and key decision.

**Discounted Service** : \$XTR holders have privilege on getting discount on the service offered by Xtreme Ecosystem, For example : Users can get discount on marketplace for the service offers to \$XTR payment.
